WORK EXPERIENCE

Senior Software Engineer Aspire Systems

05/2023 - 02/2026

Chennai, Tamil Nadu

Project - NACH(National Automated Clearing House)

Achievements/Tasks

- Implemented distributed caching using Redis, reducing database queries by ~45% and improving API response time from ~800ms to ~350ms.
- Designed and deployed event-driven architecture using Apache Kafka for asynchronous interbank transaction processing, ensuring fault tolerance and reliable message delivery.
- Implemented unit tests using Mockito achieving 80%+ code coverage across key microservices.
- Contributed to 99.95% uptime through resilient system design, monitoring, and failover strategies, while mentoring junior developers on microservices and design patterns.

Software Engineer Aspire Systems

10/2022 - 04/2023

Chennai, Tamil Nadu

Project - Sportlink

Achievements/Tasks

- Designed and implemented REST-based microservices to replace monolithic Navajo flows, enabling independent deployment and faster change cycles.
- Migrated critical modules from Navajo scripts to Java Spring Boot microservices, improving scalability, observability, and ease of deployment.

Trainee Software Engineer Aspire Systems

08/2022 - 10/2022

Chennai, Tamil Nadu

Achievements/Tasks

- Completed intensive training in Core Java, Spring Boot, REST APIs, and relational databases focused on microservices development.
- Built foundational projects applying object-oriented design, RESTful patterns, and database modeling.
